

Add capacity and capability, without adding headcount.

On a project, margin lives in the detail, and the detail never stops.

Every project runs on commercial admin that never lets up: subcontracts to administer, RFIs and variations to track, progress claims to assess against contract and SOPA dates, invoices to verify, cash flow to keep current. There is rarely budget for a commercial officer on every job. Commercial teams need a way to:

- ✓ Maximise the team's expertise
- ✓ Minimise administrative load
- ✓ Capture and codify corporate knowledge
- ✓ Achieve more output without hiring

Recognise the squeeze?

Casey takes it off your desk.

Casey is a Green Marble AI Digital Worker: not software to run or a chatbot to query, but a capable commercial team member you delegate to, just as you would a person. Casey arrives fully configured and works on your own infrastructure, across your contracts, claims and cost data. You brief in the work, Casey gets on with it, logs every action in real time, and escalates when the call should be yours.

With the commercial admin handled, your project and commercial leads get their time back for the work that actually protects margin: negotiating, judging risk, and holding the relationships that keep a job moving.

Your new Commercial Administrator is a Green Marble AI Digital Worker.

Meet Casey.

Casey runs the day-to-day commercial operations across your projects, streamlining:

Contract Administration across head contracts and subcontracts, including RFIs, site instructions and variation orders

Assessments and preparation of progress claims, in line with contract and Security of Payment terms

Cost Management, including invoice verification and processing

Reporting & Cash Flow for the Project Manager and Senior Leadership, including forecasting and account documentation

Procurement & Subcontractor Support

Stakeholder management & Correspondence

Productive in days, sharper every week.

- ✓ Casey arrives with domain expertise and industry knowledge, knowing your systems, processes and culture.
- ✓ Just like a human, Casey reads, processes and interprets contracts, variations and compliance documents, communicating in plain language with your team through a conversational interface.
- ✓ Casey uses your systems like a human, yet you maintain full control of what is done and when.
- ✓ Logging its work in real time, Casey becomes sharper with every deployment, so you never fall behind.

Delegate work to Casey.

Each Green Marble Digital Worker takes on a role, not a task. Customised, embedded and kept current, so you never re-platform.

“ Casey, run this period’s progress claim and flag anything outside the contract or SOPA timeframe. ”

“ Casey, assess this subcontractor’s payment and recommend payment or dispute. ”

“ Casey, generate a cost report – committed, forecast and cost-to-complete – and flag any budget risks. ”

Meet our Digital Workers
