

Add capacity and capability, without adding headcount.

ESG reporting is now audited, and the data behind it has to hold up.

Sustainability teams face a rising bar with the same small headcount: carbon accounting across Scope 1, 2 and 3, chasing value-chain and supplier data, keeping dashboards current, and preparing GRI and ISSB reports that will now be assured. The deadlines are fixed and the scrutiny only grows. Sustainability teams need a way to:

- ✓ Maximise the team's expertise
- ✓ Minimise administrative load
- ✓ Capture and codify corporate knowledge
- ✓ Achieve more output without hiring

Recognise the pressure?

Eddie keeps you audit-ready.

Eddie is a Green Marble AI Digital Worker: not software to run or a chatbot to query, but a capable sustainability team member you delegate to, just as you would a person. Eddie arrives fully configured and works on your own infrastructure, across your emissions data, dashboards and reporting frameworks. You brief in the work, Eddie gets on with it, logs every action in real time, and escalates when the call should be yours.

With the data-gathering and reporting handled, your sustainability specialists get their time back for the work that matters most: interpreting the numbers, engaging the business, and getting the strategy right.

Your new ESG & Sustainability Assistant is a Green Marble AI Digital Worker.

Meet Eddie.

Eddie keeps your ESG commitment measured and reported, streamlining:

Carbon accounting across Scope 1, 2 and 3

Value chain & supplier data

Emissions data & dashboards

Board and stakeholder reporting

Framework reporting to GRI and ISSB

Assurance readiness & audit trail

Productive in days, sharper every week.

- ✓ Eddie arrives with domain expertise and industry knowledge, knowing your systems, processes and culture.
- ✓ Just like a human, Eddie reads, processes and interprets emissions data and reporting frameworks, communicating in plain language through a conversational interface.
- ✓ Eddie uses your systems like a human, yet you maintain full control of what is done and when.
- ✓ Logging its work in real time, Eddie becomes sharper with every deployment, so you never fall behind.

Delegate work to Eddie.

Each Green Marble Digital Worker takes on a role, not a task. Customised, embedded and kept current, so you never re-platform.

“ Eddie, refresh our Scope 1, 2 and 3 emissions data and flag any outliers. ”

“ Eddie, draft this quarter’s sustainability report against our reporting framework. ”

“ Eddie, chase the outstanding supplier emissions data and tell me what is still missing. ”

Green Marble is backed by Red Marble AI.

Since 2017, Red Marble AI’s PhD-level engineers have spent nine years delivering 125+ enterprise AI engagements across strategy, engineering, governance and agentic transformation. Now, Green Marble AI has turned that proven engineering into a product ready to be deployed. With every Digital Worker comes:

Expertise:

We’re a local team of PhD-level Mathematicians, Physicists, Data and Computer Scientists.

Research:

Our internal AI research capability keeps products one step ahead.

Pace:

Proprietary accelerators allow us to operate at speed, delivering value fast.

Quality:

With 125+ enterprise AI engagements delivered, you’re in safe hands.

Red Marble AI’s clients include
