

Add capacity and capability, without adding headcount.

A programme is only as controlled as its admin, and admin slips first.

Every project and programme runs on administration that never stops: standing up registers, keeping RAID logs current, compiling status and rollup reports, writing up minutes and actions, and chasing risks before they bite. Delivery leads end up doing it instead of leading. Delivery and PMO teams need a way to:

- ✓ Maximise the team's expertise
- ✓ Minimise administrative load
- ✓ Capture and codify corporate knowledge
- ✓ Achieve more output without hiring

Know the feeling?

Morgan keeps it in order.

Morgan is a Green Marble AI Digital Worker: not software to run or a chatbot to query, but a capable delivery team member you delegate to, just as you would a person. Morgan arrives fully configured and works on your own infrastructure, across your registers, reports and project records. You brief in the work, Morgan gets on with it, logs every action in real time, and escalates when the call should be yours.

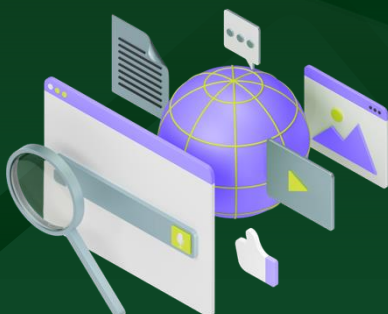

With the project administration handled, your delivery leads get their time back for the work only they can do: making the call on risk, steering stakeholders, and keeping the programme moving.

Your new Project & Programme Administrator is a Green Marble AI Digital Worker.

Meet Morgan.

Morgan keeps your projects and programmes on track from set-up to close out. Morgan can streamline:

Project administration including maintaining RAID logs and compiling status and programme rollup reports

Standing up the workspace and registers

Building agendas, taking minutes and circulating transcripts from meetings

Escalating risks by rule and chasing actions

Flagging project delivery risks before they occur

Correspondence with stakeholders, including the project team and Leadership

Productive in days, sharper every week.

- ✓ Morgan arrives with domain expertise and industry knowledge, knowing your systems, processes and culture.
- ✓ Just like a human, Morgan reads, processes and interprets project management documents, communicating in plain language with your team through a conversational interface.
- ✓ Morgan uses your systems like a human, yet you maintain full control of what is done and when.
- ✓ Logging its work in real time, Morgan becomes sharper with every deployment, so you never fall behind.

Delegate work to Morgan.

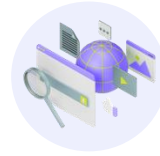

Each Green Marble Digital Worker takes on a role, not a task. Customised, embedded and kept current, so you never re-platform.

“ Pull the status across our active projects, refresh the RAID log, and flag any milestone at risk of slipping. ”

“ Build the steering committee pack from the open actions and live register items. ”

“ Generate the minutes and actions from this meeting transcript. ”

Green Marble is backed by Red Marble AI.

Since 2017, Red Marble AI's PhD-level engineers have spent nine years delivering 125+ enterprise AI engagements across strategy, engineering, governance and agentic transformation. Now, Green Marble AI has turned that proven engineering into a product ready to be deployed. With every Digital Worker comes:

Expertise:

We're a local team of PhD-level Mathematicians, Physicists, Data and Computer Scientists.

Research:

Our internal AI research capability keeps products one step ahead.

Pace:

Proprietary accelerators allow us to operate at speed, delivering value fast.

Quality:

With 125+ enterprise AI engagements delivered, you're in safe hands.
