

Add capacity and capability, without adding headcount.

In procurement, cost, risk and compliance all live in the paperwork.

Procurement carries a constant load of exacting work: running RFX and analysing responses, drafting and reviewing contracts, turning around requisitions and purchase orders, and holding suppliers to policy. It all has to be right and on time, but headcount never matches the volume. Procurement teams need a way to:

- ✓ Maximise the team's expertise
- ✓ Minimise administrative load
- ✓ Capture and codify corporate knowledge
- ✓ Achieve more output without hiring

Sound like your week?

Piper carries the load.

Piper is a Green Marble AI Digital Worker: not software to run or a chatbot to query, but a capable procurement team member you delegate to, just as you would a person. Piper arrives fully configured and works on your own infrastructure, across your sourcing, contracts and spend data. You brief in the work, Piper gets on with it, logs every action in real time, and escalates when the call should be yours.

With the sourcing and contract admin handled, your procurement specialists get their time back for the work that moves the numbers: negotiating with suppliers, setting category strategy, and managing the relationships behind both.

Your new Procurement Officer is a Green Marble AI Digital Worker.

Meet Piper.

Piper can run and streamline your day-to-day procurement operations.

Sourcing
& RFX Management

Reporting
& Analytics

Policy, Governance
& Risk

Category Monitoring
& Intelligence

Stakeholder
Management
& Communications

Reporting
& Spend Tracking

Productive in days, sharper every week.

- ✓ Piper arrives with domain expertise and industry knowledge, knowing your systems, processes and culture.
- ✓ Just like a human, Piper reads, processes and interprets professional procurement documents, communicating in plain language with your team through a conversational interface.
- ✓ Piper uses your systems like a human, yet you maintain full control of what is done and when.
- ✓ Logging its work in real time, Piper becomes sharper with every deployment, so you never fall behind.

Delegate work to Piper.

Each Green Marble Digital Worker takes on a role, not a task. Customised, embedded and kept current, so you never re-platform.

“ Piper, run an RFX for this category and analyse the supplier responses against our criteria. ”

“ Piper, triage this requisition and draft a first-pass contract from our approved template. ”

“ Piper, show me spend for this quarter, by category and supplier. Flag savings opportunities. ”

Green Marble is backed by Red Marble AI.

Since 2017, Red Marble AI's PhD-level engineers have spent nine years delivering 125+ enterprise AI engagements across strategy, engineering, governance and agentic transformation. Now, Green Marble AI has turned that proven engineering into a product ready to be deployed. With every Digital Worker comes:

Expertise:

We're a local team of PhD-level Mathematicians, Physicists, Data and Computer Scientists.

Research:

Our internal AI research capability keeps products one step ahead.

Pace:

Proprietary accelerators allow us to operate at speed, delivering value fast.

Quality:

With 125+ enterprise AI engagements delivered, you're in safe hands.

Red Marble AI's clients include
